LIST OF CONTENTS

VOLUME 41

NUMBER 1

Review
Yoichi Hayakawa — 1 Growth-blocking peptide: an insect biogenic peptide that prevents the onset of metamorphosis

Driss Radallah, Michel Nogaro and Bernard Fournier — 7 Arachidonic acid and prostaglandin E_2 stimulate phospholipase C activity in the rectum of the African locust, *Locusta migratoria migratorioides*

Baerbel Liebig, David L. Stetson and Donald H. Dean — 17 Quantification of the effect of *Bacillus thuringiensis* toxins on short-circuit current in the midgut of *Bombyx mori*

M. Schneider, G. Wiesel and A. Dorn — 23 Effects of JH III and JH analogues on phase-related growth, egg maturation and lipid metabolism in *Schistocerca gregaria* females

I. Liadouze, G. Febvay, J. Guillaud and G. Bonnot — 33 Effect of diet on the free amino acid pools of symbiotic and aposymbiotic pea aphids, *Acyrthosiphon pisum*

Tetsuhiko Sasaki and Hajime Ishikawa — 41 Production of essential amino acids from glutamate by mycetocyte symbionts of the pea aphid, *Acyrthosiphon pisum*

Wolfgang Wipking, Mareike Viebahn and Dietrich Neumann — 47 Oxygen consumption, water, lipid and glycogen content of early and late diapause and non-diapause larvae of the Burnet moth *Zygaena trifolii*

Monika Germ and Karl Kral — 57 Influence of visual deprivation on levels of dopamine and serotonin in the visual system of house crickets, *Acheta domesticus*

C. Wicker and J. M. Jallon — 65 Hormonal control of sex pheromone biosynthesis in *Drosophila melanogaster*

S. J. Simpson, J. D. Abisgold and A. E. Douglas — 71 Response of the pea aphid (*Acyrthosiphon pisum*) to variation in dietary levels of sugar and amino acids: the significance of amino acid quality

Hubert R. Spieth — 77 Change in photoperiodic sensitivity during larval development of *Pieris brassicae*

Amir Ayali and M. P. Pener — 85 The relations of adipokinetic response and body lipid content in locusts (*Locusta migratoria migratorioides*) with special reference to phase polymorphism

Jim Hardie, J. H. Visser and P. G. M. Piron — 91 Peripheral odour perception by adult aphid forms with the same genotype but different host-plant preferences

I Contents of *Insect Biochemistry and Molecular Biology*

II Diary

III Instructions to Authors

NUMBER 2

Minireview
Hugh M. Robertson — 99 The *Tc1-mariner* superfamily of transposons in animals

Roxanne M. Broadway — 107 Are insects resistant to plant proteinase inhibitors?

R. J. Weaver, Z. A. Paterson, J. E. Short and J. P. Edwards — 117 Effects of *Diploptera punctata* allatostatins on juvenile hormone biosynthesis and endogenous juvenile hormone III levels in virgin and mated female *Periplaneta americana*

Dalibor Kodrík and Graham J. Goldsworthy 127 Inhibition of RNA synthesis by adipokinetic hormones and brain factor(s) in adult fat body of *Locusta migratoria*

John M. Uscian, Jon S. Miller, Gautam Sarath and David W. Stanley-Samuelson 135 A digestive phospholipase A_2 in the tiger beetle, *Cicindella circumpicta*

André Quennedey, Nadia Aribi, Claude Everaerts and Jean-Paul Delbecque 143 Postembryonic development of *Zophobas atratus* Fab. (Coleoptera: Tenebrionidae) under crowded or isolated conditions and effects of juvenile hormone analogue applications

Friedrich Weber 153 Cyclic layer deposition in the cockroach (*Blaberus craniifer*) endocuticle: a circadian rhythm in leg pieces cultured *in vitro*

Michael J. Lee and Graham J. Goldsworthy 163 Acetate uptake test; the basis of a rapid method for determining potencies of adipokinetic peptides for structure–activity studies

B. S. Hansson, A. Blackwell, E. Hallberg and J. Löfqvist 171 Physiological and morphological characteristics of the sex pheromone detecting system in male corn stemborers, *Chilo partellus* (Lepidoptera: Pyralidae)

I. Y. Rauschenbach, T. M. Khlebodarova, N. A. Chentsova, N. E. Gruntenko, L. G. Grenback, E. I. Yantsen and M. L. Filipenko 179 Metabolism of the juvenile hormone in *Drosophila* adults under normal conditions and heat stress: genetical and biochemical aspects

Matthias W. Lorenz and Klaus H. Hoffmann 191 Allatotropic activity in the suboesophageal ganglia of crickets, *Gryllus bimaculatus* and *Acheta domesticus* (Ensifera: Gryllidae)

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 3

iii Editorial Announcement

Review
Klaus W. Beyenbach 197 Mechanism and regulation of electrolyte transport in Malpighian tubules

C. Bitsch, A. Ragab and H. Chap 209 Inhibition of phospholipase A_2 modulates fecundity in the primitive insect *Thermobia domestica* (Thysanura)

Takao Yoshida and Masahito T. Kimura 217 The photoperiodic clock in *Chymomyza costata*

Jomara Alves Cangussu and Fernando Sérgio Zucoloto 223 Self-selection and perception threshold in adult females of *Ceratitis capitata* (Diptera, Tephritidae)

G. P. Stamou, M. D. Asikidis, M. D. Argyropoulou and G. D. Iatrou 229 Respiratory responses of oribatid mites to temperature changes

Yvan Pelletier 235 Effects of temperature and relative humidity on water loss by the Colorado potato beetle, *Leptinotarsa decemlineata* (Say)

H. M. Appel and L. W. Maines 241 The influence of host plant on gut conditions of gypsy moth (*Lymantria dispar*) caterpillars

David R. Gray, F. William Ravlin, Jacques Régnière and Jesse A. Logan 247 Further advances toward a model of gypsy moth (*Lymantria dispar* (L.)) egg phenology: respiration rates and thermal responsiveness during diapause, and age-dependent developmental rates in postdiapause

X. Gu, D. Quilici, P. Juarez, G. J. Blomquist and C. Schal 257 Biosynthesis of hydrocarbons and contact sex pheromone and their transport by lipophorin in females of the German cockroach (*Blattella germanica*)

S. A. Adamo, D. Robert and **R. R. Hoy** 269 Effects of a tachinid parasitoid, *Ormia ochracea*, on the behaviour and reproduction of its male and female field cricket hosts (*Gryllus* spp)

I. Y. Rauschenbach, L. V. Shumnaya, T. M. Khlebodarova, N. A. Chentsova and L. G. Grenback 279 Role of phenol oxidases and thyrosine hydroxylase in control of dopamine content in *Drosophila virilis* under normal conditions and heat stress

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 4

G. Doury, D. Rojas-Rousse and G. Periquet 287 Ability of *Eupelmus orientalis* ectoparasitoid larvae to develop on an unparalysed host in the absence of female stinging behaviour

B. Ruhfus and D. Zinkler 297 Investigations on the sources utilized for the energy supply fuelling the jump of springtails

Raymond V. Barbehenn and Michael M. Martin 303 Peritrophic envelope permeability in herbivorous insects

B. W. Staddon 313 Observations on growth, morphogenesis and programmed obsolescence of scent glands in the milkweed bug, *Oncopeltus fasciatus* (Heteroptera)

Jonathon A. Weier, Donald H. Feener Jr and John R. B. Lighton 321 Inter-individual variation in energy cost of running and loading in the seed-harvester ant, *Pogonomyrmex maricopa*

David Berrigan and David J. Pepin 329 How maggots move: allometry and kinematics of crawling in larval diptera

Peter W. K. Ma and Wendell L. Roelofs 339 Sites of synthesis and release of PBAN-like factor in the female European corn borer, *Ostrinia nubilalis*

Masatsugu Hatakeyama, Yuji Kageyama, Tetsu Kinoshita and Kugao Oishi 351 Completion of development in *Athalia rosae* (Hymenoptera) eggs matured with heterospecific *Athalia infumata* yolk protein

G. S. McIntyre and R. H. Gooding 357 Pteridine accumulation in *Musca domestica*

Deborah C. Jaworski, Frank A. Simmen, William Lamoreaux, Lewis B. Coons, Mark T. Muller and Glen R. Needham 369 A secreted calreticulin protein in ixodid tick (*Amblyomma americanum*) saliva

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 5

Jean-François Picimbon, Jean-Marc Becard, Leam Sreng, Jean-Luc Clement and Christophe Gadenne 377 Juvenile hormone stimulates pheromonotropic brain factor release in the female black cutworm, *Agrotis ipsilon*

Akinori Hirashima, Ryuko Takeya, Eiji Taniguchi and Morifusa Eto 383 Metamorphosis, activity of juvenile-hormone esterase and alteration of ecdysteroid titres: effects of larval density and various stress on the red flour beetle, *Tribolium freemani* Hinton (Coleoptera: Tenebrionidae)

Peter I. Webb and Steven R. Telford 389 Energy and water balance in the large sub-tropical millipede *Alloporus bilobatus* (Diplopoda: Spirostreptidae)

O. Anderbrant, B. S. Hansson, E. Hallberg, C. Geri, M. Varama, E. Hedenström, H.-E. Högberg, J. Fägerhag, H. Edlund, A.-B. Wassgren, G. Bergström and J. Löfqvist 395 Electrophysiological and morphological characteristics of pheromone receptors in male pine sawflies, *Diprion pini* (Hymenoptera: Diprionidae), and behavioural response to some compounds

Michael Friedländer and John J. Brown 403 Tebufenozide (Mimic®), a non-ecdysteroidal ecdysone agonist, induces spermatogenesis reinitiation in isolated abdomens of diapausing codling moth larvae (*Cydia pomonella*)

A. T. Marshall, P. Kyriakou, P. D. Cooper, R. Coy and A. Wright — 413 Osmolality of rectal fluid from two species of osmoregulating brine fly larvae (Diptera: Ephydridae)

B. A. Goodman, S. C. Gordon, J. A. Chudek, G. Hunter and J. A. T. Woodford — 419 Nuclear magnetic resonance microscopy as a non-invasive tool to study the development of lepidopteran pupae

C. F. Hinks and M. A. Erlandson — 425 The accumulation of haemolymph proteins and activity of digestive proteinases of grasshoppers (*Melanoplus sanguinipes*) fed wheat, oats or kochia

Emmy Van Kerkhove, Patrick Pirotte, David H. Petzel and David W. Stanley-Samuelson — 435 Eicosanoid biosynthesis inhibitors modulate basal fluid secretion rates in the Malpighian tubules of the ant, *Formica polyctena*

T. S. Adams, D. R. Nelson and C. L. Fatland — 443 Effect of methylalkanes on male house fly, *Musca domestica*, sexual behavior

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 6

Alexei Redkozubov — 451 High electrical resistance of the bombykol cell in an olfactory sensillum of *Bombyx mori*: voltage- and current-clamp analysis

Sardar S. Sohi, Subba R. Palli, Barbara J. Cook and Arthur Retnakaran — 457 Forest insect cell lines responsive to 20-hydroxyecdysone and two nonsteroidal ecdysone agonists, RH-5849 and RH-5992

E. R. Rumbo, D. M. Suckling and G. Karg — 465 Measurement of airborne pheromone concentrations using electroantennograms: interactions between environmental volatiles and pheromone

Chih-Ming Yin, Bai-Xiang Zou, Mugeng Jiang, Mei-Fang Li, Wenhong Qin, Thomas L. Potter and John G. Stoffolano Jr — 473 Identification of juvenile hormone III bisepoxide (JHB_3), juvenile hormone III and methyl farnesoate secreted by the corpus allatum of *Phormia regina* (Meigen), *in vitro* and function of JHB_3 either applied alone or as a part of a juvenoid blend

Louis L. Pech and Michael R. Strand — 481 Encapsulation of foreign targets by hemocytes of the moth *Pseudoplusia includens* (Lepidoptera: Noctuidae) involves an RGD-dependent cell adhesion mechanism

Howard W. Fescemyer, Edward P. Masler, Thomas J. Kelly and Willam R. Lusby — 489 Influence of development and prothoracicotropic hormone on the ecdysteroids produced *in vitro* by the prothoracic glands of female gypsy moth (*Lymantria dispar*) pupae and pharate adults

Sonny B. Ramaswamy, Russell A. Jurenka, Charles E. Linn Jr and Wendell L. Roelofs — 501 Evidence for the presence of a pheromonotropic factor in hemolymph and regulation of sex pheromone production in *Helicoverpa zea*

A. B. Koopmanschap, J. H. M. Lammers and C. A. D. de Kort — 509 The structure of the gene encoding diapause protein 1 of the Colorado potato beetle (*Leptinotarsa decemlineata*)

Peter E. A. Teal and Andrea Oostendorp — 519 Effect of interspecific hybridization between *Heliothis virescens* and *H. subflexa* (Lepidoptera: Noctuidae) on sex pheromone production by females

Young Seok Hong, Moshe Reuveni and Jonathan J. Neal — 527 A sodium- and potassium-stimulated tyrosine transporter from *Leptinotarsa decemlineata* midguts

Stephen T. Trumbo, David W. Borst and Gene E. Robinson — 535 Rapid elevation of juvenile hormone titer during behavioral assessment of the breeding resource by the burying beetle, *Nicrophorus orbicollis*

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 7

Review
S. J. Simpson and D. Raubenheimer 545 The geometric analysis of feeding and nutrition: a user's guide

M. S. J. Simmonds, W. M. Blaney, R. B. Grossman and S. V. Ley 555 Behavioural responses of locusts and *Spodoptera littoralis* to azadirachtin and azadirachtin analogues containing fluorescent and immunogenic reporter groups

A. J. Elia, Tomas G. A. Money and I. Orchard 565 Flight and running induce elevated levels of FMRFamide-related peptides in the haemolymph of the cockroach, *Periplaneta americana* (L.)

Hiroyuki Ai, Kiyoaki Kuwasawa, Tohru Yazawa, Makoto Kurokawa, Masami Shimoda and Kenji Kiguchi 571 A physiological saline for lepidopterous insects: effects of ionic composition on heart beat and neuromuscular transmission

A. B. Lange, W. G. Bendena and S. S. Tobe 581 The effect of the thirteen Dip-allatostatins on myogenic and induced contractions of the cockroach (*Diploptera punctata*) hindgut

Yaacov Lensky, Pierre Cassier and David Tel-Zur 589 The setaceous membrane of honey bee (*Apis mellifera* L.) workers' sting apparatus: structure and alarm pheromone distribution

A. Liscia, J. G. Stoffolano Jr, I. Tomassini Barbarossa, P. Muroni and R. Crnjar 597 Sensitivity to albumin and its terminal amino acids of labellar taste chemoreceptors in *Protophormia terraenovae* (*Diptera*: *Calliphoridae*)

Kira A. Steigerwald, Marcia R. Lee, Richard E. Lee Jr and Jane C. Marshall 603 Effect of biological ice nucleators on insect supercooling capacity varies with anatomic site of application

T. S. Adams, D. R. Nelson and Gary J. Blomquist 609 Effect of endocrine organs and hormones on (*Z*)-9-tricosene levels in the internal and external lipids of female house flies, *Musca domestica*

Wen-Hong Qin, Chih-Ming Yin and John G. Stoffolano Jr 617 The role of the corpus allatum in the control of vitellogenesis and fat body hypertrophy in *Phormia regina* (Meigen)

Vladimír Košťál and Petr Šimek 627 Dynamics of cold hardiness, supercooling and cryoprotectants in diapausing and non-diapausing pupae of the cabbage root fly, *Delia radicum* L.

I Contents of *Insect Biochemistry and Molecular Biology*

V Instructions to Authors

NUMBER 8

T. L. Wilkinson and A. E. Douglas 635 Aphid feeding, as influenced by disruption of the symbiotic bacteria: an analysis of the pea aphid (*Acyrthosiphon pisum*)

J. P. Edwards, T. C. Corbitt, H. F. McArdle, J. E. Short and R. J. Weaver 641 Endogenous levels of insect juvenile hormones in larval, pupal and adult stages of the Tomato moth, *Lacanobia oleracea*

A. T. Strathdee, G. G. Howling and J. S. Bale 653 Cold hardiness of overwintering aphid eggs

Flavio Roces and Josué A. Núñez 659 Thermal sensitivity during brood care in workers of two *Camponotus* ant species: circadian variation and its ecological correlates

Brian D. Burrell and Brian H. Smith 671 Modulation of the honey bee (*Apis mellifera*) sting response by octopamine

G. A. Horridge and S. W. Zhang 681 Pattern vision in honeybees (*Apis mellifera*): flower-like patterns with no predominant orientation

Yibin He, Toshiharu Tanaka and Tadashi Miyata 689 Eupyrene and apyrene sperm and their numerical fluctuations inside the female reproductive tract of the armyworm, *Pseudaletia separata*

S. Dijkstra, A. Leyssens, E. Van Kerkhove, W. Zeiske and P. Steels 695 A cellular pathway for Cl^- during fluid secretion in ant Malpighian tubules: evidence from ion-sensitive microelectrode studies?

Eric B. Jang 705 Effects of mating and accessory gland injections on olfactory-mediated behavior in the female Mediterranean fruit fly, *Ceratitis capitata*

R. K. Saini, M. M. Rai, A. Hassanali, J. Wawiye and H. Odongo 711 Semiochemicals from froth of egg pods attract ovipositing female *Schistocerca gregaria*

A. Liscia, J. G. Stoffolano Jr, I. Tomassini Barbarossa, P. Muroni and R. Crnjar 717 Effects of ATP on the interaction of albumin and its C-terminal amino acid L-alanine with the "sugar" receptor cell in *Protophormia terraenovae* (Diptera: Calliphoridae)

Michael B. Blackburn, Renee M. Wagner, Jeffrey Shabanowitz, Jan P. Kochansky, Donald F. Hunt and Ashok K. Raina 723 The isolation and identification of three diuretic kinins from the abdominal ventral nerve cord of adult *Helicoverpa zea*

I Contents of *Insect Biochemistry and Molecular Biology*

III Diary

V Instructions to Authors

NUMBER 9

Michael T. McManus and E. P. J. Burgess 731 Effects of the soybean (Kunitz) trypsin inhibitor on growth and digestive proteases of larvae of *Spodoptera litura*

B. Hölldobler, N. J. Oldham, E. D. Morgan and W. A. König 739 Recruitment pheromones in the ants *Aphaenogaster albisetosus* and *A. cockerelli* (Hymenoptera: Formicidae)

Tracey J. Webb and Hilary Hurd 745 The use of a monoclonal antibody to detect parasite induced reduction in vitellin content in the ovaries of *Tenebrio molitor*

Jacob S. Ishay and Vered Barenholz-Paniry 753 Thermoelectric effect in hornet (*Vespa orientalis*) silk and thermoregulation in a hornet's nest

H. Cruse and Ch. Bartling 761 Movement of joint angles in the legs of a walking insect, *Carausius morosus*

Elisabeth Hansen-Delkeskamp and Kai Hansen 773 Responses and spike generation in the largest antennal taste hairs of *Periplaneta brunnea Burm.*

S. J. Coulson, I. D. Hodkinson, W. Block, N. R. Webb and M. R. Worland 783 Low summer temperatures: a potential mortality factor for high Arctic soil microarthropods?

J. Šula, D. Kodrík and R. Socha 793 Hexameric haemolymph protein related to adult diapause in the red firebug, *Pyrrhocoris apterus* (L.) (Heteroptera)

Louis L. Pech, Dominique Trudeau and Michael R. Strand 801 Effects of basement membranes on the behavior of hemocytes from *Pseudoplusia includens* (Lepidoptera; Noctuidae): development of an *in vitro* encapsulation assay

B. A. Dover, A. Menon, R. C. Brown and M. R. Strand 809 Suppression of juvenile hormone esterase in *Heliothis virescens* by *Microplitis demolitor* calyx fluid

Takashi Okuda and Keiko Kadono-Okuda 819 *Perilitus coccinellae* teratocyte polypeptide: evidence for production of a teratocyte-specific 540 kDa protein

I Contents of *Insect Biochemistry and Molecular Biology*
